

# Running out of ice time: the 4-3-2 Rule

**FOUR**-there is four minutes left on the ice time.

**THREE**-there is more than three minutes left in the game.

**TWO**-cut the clock to two minutes and inform both teams

*What if the current game was delayed by the end of the last game?*

*The current game's ice time starts when the ice is ready for the teams to go one. Therefore, if the game has one hour of ice, but the ice is available 5 minutes late, the ice time ends 5 minutes later than originally scheduled.*
